Support to licensing and regulation

At Orano Projects Limited we offer support to many aspects of nuclear site licensing. Our consultants work closely with nuclear site licensees in a wide range of areas that relate to applying for and obtaining a nuclear site license. Our teams also support continuing compliance with the nuclear site license conditions and the eventual delicensing of sites.

Our consultants licensing expertise encompasses safety case production, production of modifications, identification and formulation of operating rules, identification of maintenance requirements, emergency arrangements, periodic review, management systems, definition of commissioning requirements, radioactive waste management, decommissioning, relicensing or delicensing and organisational capability.

With knowledge of their field that is second to none, our technical specialists are all of Senior Consultant level or above, with extensive industry experience. Integrating the full weight of this experience into all our projects, we work closely with licensees to ensure compliance with nuclear license site conditions.

orano
Giving nuclear energy its full value

Orano Projects delivers comprehensive and expert support to the licensing and delicensing of nuclear facilities. Our expert consultants are based throughout the UK and have hands-on experience of licensing in both the civil nuclear and defence sectors, allowing us to support our clients in all aspects of the licensing process

Specialist expertise

With extensive experience in many aspects of site licensing, we have dedicated in-house experts in the following areas, who are able to support clients through each stage of the process:

- Application for Nuclear Site License, Relicensing, Delicensing or Partial Delicensing of a Nuclear Site;
- Safety Case Production;
- Independent Peer Review;
- Waste Management;
- Decommissioning Planning & Safety Justification;
- Organisational Capability including safety management prospectus production and nuclear baseline definition;
- Production of License Condition Compliance Arrangements;
- Sampling and Analysis for Delicensing and Site Clearance.

What do we offer?

- Development of Corporate Arrangements for the Production of Safety Cases (Safety Case manuals etc);
- Development of License Condition Compliance Arrangements;
- Guidance on the Development and Maintenance of Organisation Structures, Resources and Competencies for Managing Safety (the organisational baseline) and Production of Associated Documentation;
- Guidance and review by Human Factors Specialists of the Arrangements for Developing and Maintaining Competence (LC36);
- Guidance on and Review of Knowledge Management and Transfer Arrangements – Particularly in relation to decommissioning and site remediation – and associated record management arrangements
- Support to the Licensee in Key Technical Areas to ensure 'intelligent customer' status;
- Guidance on the Requirements for Delicensing (including partial site delicensing)
- Guidance on the Requirements for Delicensing for new Licence.

Why choose

Orano Projects?

Orano Projects' nuclear safety experience has been developed through extensive project work with civil nuclear and defence site licensees in the UK. We have a number of consultants with experience in providing advice to licensees on the development and maintenance of arrangements for compliance with the conditions of the nuclear site license and offer a wide range of specialist services that deliver high-quality support to the licensing and delicensing process.

Our robust quality assurance systems and internal verification procedures ensure that all work is delivered to the highest possible standard of quality and fully meets the specified requirements.
