

Quality Policy

Orano Projects Limited is dedicated to providing a professional service to the highest possible standards of quality and to maintaining a Quality Management System (QMS) which ensures that our activities, services and deliverables meet client requirements and, as appropriate, the needs and expectations of other interested parties.

Orano Projects Limited is committed to continuing improvements in quality in order to establish a lead in its field.

We follow the BS EN ISO 9001:2015 standard as an integral part of our efforts towards sustainable development and improving performance and are committed to seeking ongoing accreditation against this standard.

Key elements in achieving these policy aims are:

- effective, visible leadership. Top managers are accountable for the QMS and promote its importance. They ensure that quality requirements are integral to business processes and consistent with the strategic direction of Orano Projects Limited and the context in which it operates.
- setting realistic and measurable quality objectives that are embedded in our business objectives for each year
- monitoring and evaluating the effectiveness of the QMS, through auditing and management reviews
- ensuring that all employees understand their roles and responsibilities relating to the QMS, and providing them with the necessary training and support
- ensuring that suppliers conform to relevant aspects of the QMS
- seeking feedback from clients and other interested parties
- encouraging the identification of opportunities for improvement, identifying the causes of non-conformities, and implementing appropriate improvements as a result, underpinned by the necessary resources.
